

Half Term Highlights Christmas Crafternoon

A visit to see Santa in his grotto

This topic plan gives an idea of some of the things children in YR will experience this half term.

They will also have opportunities to lead their own learning and follow their own lines of enquiry.

Personal social & Emotional Development

We will have circle times to talk about things that matter to us.

We will work in teams to get jobs done.

We will think about how our actions make others feel.

Literacy

We will consolidate our knowledge of sounds and letters and use this knowledge to start to write words.

We will draw and write pictures and words to communicate meaning.

We will continue to take books home to read and share

Reception Autumn 2

Fire and Ice

Communication & Language

We will play games and take part in activities that require us to listen to, understand and respond to others.

We will have chance to tell stories and have them recorded by an adult and then read out loud.

Maths

We will be introduced to Suzy Chef and Betty Baker in the Number Muncher Cafe. They need lots of mathematical help to help run the cafe smoothly.

Physical Development

We will listen to music linked to the topic Fire and ice and make up dances in response.

We will continue to use the big apparatus outside to develop our core muscles and develop gross motor skills

Understanding the World

We will explore the properties of ice and how freezing changes materials. We will explore the effects of heat on different materials.

We will discover how people around the world use fire in celebrations.

Expressive art & Design

We will use our topic of Fire and Ice as a stimulus to create pieces of art work and create sounds
