

Tuesday 3rd February 2026

Dear Parents and Carers,

We are learning about materials and their uses in our science lessons this half-term and we have designed containers to protect eggs when dropped from heights of one, two and three metres.

We are asking parents and carers to help provide junk modelling materials to help with this. These could include a variety of household materials, including card, cardboard, sponge, bubble wrap, tubes, fabrics, etc. We will be compiling our materials over the next week and will be bringing our designs to life on Wednesday 11th February.

Kind regards,

Mr Bull

Year 2 Class Teacher
